Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at [www.onsemi.com](http://www.onsemi.com). Please email any questions regarding the system integration to [Fairchild\\_questions@onsemi.com](mailto:Fairchild_questions@onsemi.com).

## Dual SPST Depletion Mode Audio Switch

### Features

- Dual SPST
- Depletion Mode Technology
- -3 dB Bandwidth: 240 MHz
- $V_{CC-OFF}$ : 1.5 V to 3.0 V
- $V_{CC-ON}$ : 0 V to 0.2 V
- $V_{SW-OFF}$ : -0.3 V to 3 V
- $V_{SW-ON}$ : -0.3 V to 3 V
- $R_{ON}$ : 0.38  $\Omega$  Typical
- $R_{ON}$  Flat: 0.01  $\Omega$  (Typical)
- THD+N: 0.0005% (Typical)
- Fairchild Green, RoHS Compliant, Halogen Free

### Description

The FSA551 is a high-performance dual single-pole single-throw (SPST x 2) audio switch. The Depletion Mode technology allows the device to conduct signals when there is no  $V_{CC}$  available and to isolate signals when  $V_{CC}$  is present. During signal conduction, the Depletion Mode gate control allows the FSA551 to achieve excellent THD+N performance while consuming minimal power.

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

## Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding these ratings or designing to Absolute Maximum Ratings.
